

For patients attending their lung screening appointment

WHAT HAPPENS AFTER YOUR LUNG SCREENING?

RESULTS

Your results will be mailed to you and your primary care provider within three weeks.

FURTHER TESTING

Depending on your results, you may be asked to return for additional testing to look more closely at an area.

REMEMBER !

Since the risk of lung cancer increases as you age, screening works best when you receive regular scans to look for any changes over time. This is why it's important to return for lung screening when you're due.
