## ERRATUM

### CANCER DRUG MANUAL – INOTUZUMAB OZOGAMICIN

In the Cancer Drug Manual announcement of the **New Interim Monograph and Patient Handout** on **Inotuzumab ozogamicin** in the February 2019 issue of the Systemic Therapy Update, please note the following correction and omissions.

- Correction:
  - The announcement incorrectly stated that “*Cycle 2 and optional additional cycles are dosed based on whether a complete response was achieved in cycle 1, and are given every 3 to 4 weeks.*” It should state that **cycle 1** can be given **every 3 to 4 weeks**, while **cycle 2 and beyond** should be given **every 4 weeks**.
- Omissions:
  - Expert review was provided by Dr. David Sanford (hematologist) of the BC Cancer Leukemia and Bone Marrow Transplant Tumour Group and **Katherine Lacia (pharmacist)** of the Leukemia/Bone Marrow Transplant Program of BC, Vancouver General Hospital.
  - **Infusion bag** should be protected from UV and fluorescent light during **preparation, storage and administration**; light protection of the **infusion line** is also required if administration is not completed within 1 hour of hanging the bag.
