The Point of Care (POC) Using Urine Test Strips

Your progress

The Point of Care (POC): Use of Reagent Test Strips for Urinalysis

Annual Self-Directed Continuing Competency Validation & Record

Objectives of This Module:

- Annual validation for the Point of Care reagent strip testing for continuing practice competency
- Review the testing procedure using the recommended textbook reference in Perry and Potter Clinical Nursing Skills & Techniques (8th Edition)

Review the Urine Testing Procedural Guideline

- Review Perry, A., Potter, P. and Ostendorf, W. (2014). Clinical Nursing Skills and Techniques (8th ed.) Procedural Guideline 43-2 - Urine Screening for Glucose, Ketones, Protein, Blood and pH. (pp.1060). St. Louis: Elsevier
- Another optional review is the accompanying insert that is in the reagent test strip packaging

Validation of Reagent Test Strips for Urine Testing

Complete the Validation linked below:

Validation of Reagent Test Strips for Urine Testing

The Point of Care (POC) Using Urine Test Strips

Validation of Reagent Test Strips for Urine Testing

By checking off I agree, you are agreeing to the statement as deemed accurate for maintaining your practice competency:
I have reviewed the Perry, A., Potter, P. and Ostendorf, W. (2014) Clinical Nursing Skills and Techniques (8th ed.) Procedural Guideline 43-2 - Urine Screening for Glucose, Ketones, Protein, Blood and pH. (pp. 1060). St. Louis: Elsevier.
I am able to perform the above skills independently.
I understand that it is my responsibility to ensure I maintain the competencies for point of care urine testing.

I Agree

SAVE MY CHOICE

2. It is recommended to participate with support nurse before self-directed QC testing of urine dipsticks.
3. Submit certificate of completion to nurse lead, educator or who keeps track of continuing education. 6th floor email to Julia Jordan.
